## Education

Stevens Institute of Technology (2022-2026)
Bachelor of Science in Computer Science (minor in Visual Arts & Technology)
Cumulative GPA: 3.93

## Skills

- **Web Development** - React, Express, MongoDB, SQLite, GraphQL, REST APIs, Docker, Tailwind, jQuery.
- **Agentic AI** - OpenAI/Anthropic API, Vercel AI SDK
- **AWS** - CloudFormation, ECS, RDS, EC2, Lambda, Bedrock AgentCore
- **Systems Programming** - Linux, C/C++, Assembly, GDB, Bash, AWS EC2
- **Data Science** - Python, Pandas, Jupyter Notebook, R, SQL
- **VCS** - Git, GitHub, Bitbucket
- **Microsoft Office -** Excel (openpyxl), Word, PowerPoint, Smartsheet

## Courses

TCP/IP Networking, System Administration, Data Mining, Concurrent Programming, Operating Systems, Web Programming, Database Management, Agile, Systems Programming, Data Structures, Algorithms, Computer Architecture

## Professional Experience

**Agentic Engineer** at Noom
*2026/06 – present*

- Built an agent platform for internal business use, supporting Marketing, Finance, HR, B2B.
- Responsible for configuring and deploying platform to AWS through GitHub workflows.
- Handled agent identity and permissioning org-wide with audit logs and observability.
- Adopted agent-driven development.

**Software Development Intern** at Agentuity
*2025/05 – 2026/02*

- Developed AI Agents using several frameworks including OpenAI and Anthropic.
- Created a Smartlead agent as a part of a multi-agent Customer Relationship Management system, which receives incoming emails, adds data to database, and sends auto-replies.
- Worked with technologies such as: memory layers, code sandboxes, vector storage, multi-agent orchestration.

**Course Assistant** at Stevens Institute of Technology
*2024/08 – present*

- Taught labs, hosted office hours, and graded assignments for Computer Architecture and Systems Programming.
- Utilized C/C++, Assembly, Linux, and Bash.

**Development Intern** at Mericle Commercial Real Estate Services
*2024/05 – 2024/08*

- Researched, developed, and pitched solutions for AI and API integrations to automate document control.
- Created a tool for scheduling employee trainings, streamlining training process and enhancing organization.
- Utilized Selenium, Chromedriver, openpyxl, REST APIs, Microsoft Office Suite.

**Research Assistant** at LIINES of Stevens Institute of Technology
*2023/05 – 2024/05*

- Acquired and visualized data from the U.S. Energy Information Administration, coordinating and compiling over 10,000 figures into a comprehensive book. Automated data retrieval and visualization via Python libraries.
- Utilized Python, Jupyter Notebook, Pandas, Matplotlib, REST APIs, LaTeX, and BitBucket.

## Projects

**"Nick's Computer"**
*2026 - present*

- Hand-coding upkeep project. Experimental blog website focused on coding personal projects without any AI assistance. See link for latest works.

**Portfolio**
*2025 - present*

- Self-study project utilizing Docker, React + Tailwind CSS, and Nginx to host a portfolio of my professional and personal projects on a Raspberry Pi. (Since moved to GitHub pages).
- Applied practical networking concepts and skills such as reverse proxy configuration, SSL/TLS certificate management, port forwarding, and DNS routing to enable secure external access.

**California Wildfire Data Analysis**
*2025*

- Developed an agentic model using Anthropic API and E2B Sandbox that autonomously generates and executes Python code to predict wildfire property damage from historical California data.
- Ran common data science models (CART, KNN, etc.) and compared accuracy.
- Utilized Python, Jupyter Notebook, Pandas, scikit-learn.

**BR@NCH**
*2026*

- Developed a neighboorhood exploration app for QuackHacks 2026 with live location discovery via Photon API.
- Implemented a nested waypoint tree system with category-filtered map markers, journal entries, and a mobile-responsive side panel across a full-stack REST API architecture.
